

SERVICING

We recommend cleaning with a soft dry cloth. Do not use solvents or abrasive cleaners as these could damage the finish.

This system contains non-replaceable parts and cannot be serviced. If damage occurs, the part should be scrapped.

WASTE DISPOSAL

Waste electrical products should not be disposed of with household waste. Please recycle where facilities exist. Check with your local authority or retailer for recycling advice.

WARRANTY INFORMATION

The Evolve Lighting standard 5 year warranty applies for this product. Up until 5 years from the date of purchase, we guarantee that this product will be:

- ✓ Free from defects in materials and workmanship
- ✓ Fit for the purpose for which it is designed
- ✓ Matches its specifications and any sample given

During this period, if the product has a defect of this nature, it will be repaired or replaced free of charge by Evolve, with the same item, or an acceptable replacement.

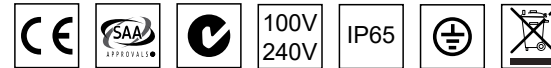

Please ensure that this product is installed correctly, as our warranty service will not apply if:

- ✓ The luminaire has not been installed by a qualified electrician or installer
- ✓ The product has been incorrectly installed
- ✓ The product is installed in an unsuitable environment

Please see our website for further warranty information

INSTALLATION

Existing fittings must be completely removed before installation of a new product. Before removing the existing fitting, carefully note the position of each set of wires.

When installing the product, ensure there is a joist at the point of fixing to support the weight of the product. Take care to avoid damaging any concealed wiring or pipes. The correct fixings should be used for brick, cavity walls, or plasterboard.

WIRING

Remove the cover from the terminal block. Use the correctly identified wiring from the existing light fitting to connect to the connection block inside the product in the following way:

Check that:

- ✓ The wiring has been correctly identified.
- ✓ The connections are tight.
- ✓ No loose strands have been left out of the connection black.

LAYOUT/COMMISSIONING

Ensure that the cables will reach the distance between the junction box and the light fitting. Position cables and junction boxes (not supplied) away from areas where they may be at risk from being cut, trapped, or damaged.

When mounting, ensure that the power supply is at the bottom of the product, to maintain the IP rating.
